PowerBully SCOUT

The PowerBully SCOUT is your rugged, light weight utility track carrier specifically designed to transport work crews to hard to reach job sites under most conditions. It can be trailered behind a conventional pickup truck.

Simple to operate and economical to run. Whether inspecting powerlines, repairing mountain top radio towers, bringing fuel to remote stations or maintaining wind farms, with PowerBully SCOUT in your fleet, you have the right carrier to get the job done. Made in USA. contact@powerbully.com
